

STEVEN LONG TRAN

Senior Product Designer — enterprise systems made clear

San Francisco Bay Area · (415) 494-7055 · hello@steveux.com · steveux.com · linkedin.com/in/stevenlongtran

Eleven years designing high-stakes enterprise products — telecom commerce, payments, trade-in logistics, API platforms — where legacy systems, business rules, and real users collide. Most recently: leading design for an AI-native enterprise ordering platform built for human and AI-agent users.

EXPERIENCE

T-MOBILE Senior Product Designer

2021 – 2026

- **Led design of the API Marketplace (3 designers, lead for first 3 months):** an AI-native enterprise ordering platform where frontier models interpret customer data and real-time UI serves as the confirmation layer — designed for human and AI-agent users; projected enterprise order time from 2–4 hours to 10–20 minutes.
- **Structured the pilot program:** waived-fee launch cohort of ~12 enterprise partners — resolving legal's AI-liability objections and converting token-cost fears into measured pilot telemetry.
- **Rebuilt trade-in end to end across four surfaces:** owned the e-commerce flow in a 4-designer, 2-month rebuild spanning e-commerce, Account Hub, Education, and Salesforce; order completion rose ~10% per business client.
- **Met 200 codebases of legacy where they were:** designed spreadsheet bulk upload matched to legacy data formats with pre-submission validation, eliminating silent downstream order failures for fleet-scale trade-ins.
- **Sustained delivery:** 118+ shipped projects across 8 product flows — account management, registration, payments and credit check, ServiceNow order flows, and design-system contributions.

SPODIO Senior Product Designer

2021

- Redesigned a sports-betting platform: odds views, bet flows, account management, and recommended actions.

WESTERN UNION Senior Product Designer

2018 – 2019

- **Redesigned how people find money:** reframed the 40,000-location retail agent locator from a pin map into an eligibility-first tool (task-based search, disqualifying info on results); shipped responsive across 200+ countries and 40+ languages.
- **End-to-end design across the remittance core:** onboarding and registration, money transfer and status, loyalty, dashboards, notifications — 72+ projects across 8 product flows on web and mobile.

VISCIRA UX/UI Designer

2015 – 2017

- **UX design lead for pharma and biotech clients:** 32+ digital products for Alexion, BMS, GSK, Genentech, and Roche — responsive sites, interactive presentations, digital sales aids, touchscreen and VR/AR experiences.
- **Shipped under NDA and regulatory review:** every design decision documented and defensible inside medical-legal review — including a rare-disease education site whose research-backed architecture held traffic through a full rebuild and earned a 2-year client extension.

EARLIER Koé (UX/UI, 2015) · Freelance product design (2015 – present)

- Koé: mobile-first anonymous workplace-communications platform (iOS, responsive web, dashboard).

AI-NATIVE PRACTICE

- **Design for human + AI users:** designing agentic patterns where models interpret, interfaces verify, and humans confirm — including MCP-style integrations and AI agents as first-class users.
- **Working systems, not slideware:** a personal AI operating system (markdown + skills + automated reviews) running daily planning, CRM, and weekly reviews; an AI-assisted brand-audit workflow compressing research to minutes.
- **Prototyping and shipping in code:** current portfolio (steveux.com) designed directly in code, AI-assisted — no mockup phase.

SKILLS & TOOLS

- Complex enterprise workflows · design systems · information architecture · user research and usability testing · rapid prototyping · A/B testing · cross-functional facilitation
- Figma · Claude / Claude Code · UserTesting · Maze · Miro · Jira · Confluence · prototyping in code (HTML/CSS/JS)

EDUCATION & LANGUAGES

- University of California, San Diego — B.S. Management Science; B.A. History
- General Assembly — UX Design Immersive (2015)
- English · Vietnamese · Spanish
